What the experts say

"These [Navi light 360°] are a very good solution to the problem that many [water users] do not have the required safety lighting. We are delighted to put Navisafe lighting products on our list of approved safety equipment. In addition, we will use the Navi light Red/Green as the only light on the "Match Race DS 37 boats" which do not have any electricity onboard. We will intend to use the Navi light Red/Green along with the Telescopic pole on our Rib boats. It is hard to find an appropriate lighting solution for our specialized use, however, the fact that the Navi list can be stored away during the daytime so it will not get broken makes it a perfect solution for us." **Jan-Erik Næss - Secretary General KNS / Royal Norwegian Yacht Club**
